

Intensive Care Services

About the Service

This service provides intensive care for complex, critical and unstable medical conditions. It includes: adults intensive care, pediatric intensive care, neonatal intensive care, cardiac intensive care, and cardiac surgery intensive care.

Service Process

- Patients referred from labour rooms, operating theaters, or in-patient or emergency departments of the same hospital/others, are admitted.
- Treatment provided is based on the patient's condition and appropriate treatment plan.

Service Fees

Service fees are applied on a case-by-case basis and according to health card type and a valid health insurance (if any)
