

# **Preventive Vaccinations**

## **About the Service**

This service provides immunization from infectious diseases to individuals, thereby protecting society as a whole. Epidemiological surveillance procedures and analyses are applied according to the type of disease and mechanisms are followed to eliminate and control infectious diseases. This requires the direct vaccination of contacts or the organization of national/supplementary immunization campaigns (SIA).

{c1da060b-d67b-471c-bc92-2d54f6326097}

## **Service Process**

- Register in the digital-services, create user name and password (If not yet registered), and login
- Book an appointment for the vaccination.
- Visit the vaccination center.
- Register for vaccination, and submit the necessary documents.
- Assess the health situation.
- Recieve the vaccine.

## **Required Documents**

- Emirates National ID

## **Conditions & Requirements**

1. During epidemiological cases, work is carried out according to epidemiological surveillance reports and data. The categories of contacts for cases of infectious disease and those who should be vaccinated to prevent the disease are identified
2. Target categories should be covered by the implementation of additional/supporting national immunization campaigns against the specific infectious disease
3. Work is conducted according to the approved standards and specific strategies and implementation plans for each national immunization campaign
4. Vaccine should not be administered when a patient has previously experienced an allergic reaction to any component
5. Vaccine should not be administered to a patient with moderate to severe health conditions at the time of vaccination

## **Service completion duration**

- 60 mins

## **Service Fees**

Free

## **Service channels**

Service Centers (Primary Healthcare Centers)
